

POLITECHNIKA KRAKOWSKA
IM. TADEUSZA KOŚCIUSZKI

KARTA PRZEDMIOTU

obowiązuje studentów rozpoczynających studia w roku akademickim 2017/2018

Wydział Inżynierii i Technologii Chemicznej

Kierunek studiów: Technologia Chemiczna

Profil: Ogólnoakademicki

Forma sudiów: stacjonarne

Kod kierunku: T

Stopień studiów: II

Specjalności: Innovative Chemical Technologies (4sem)

1 INFORMACJE O PRZEDMIOCIE

| | |
|--------------------------------------|------------------------------------|
| NAZWA PRZEDMIOTU | ST-2_ICT Biofuels and bioresources |
| NAZWA PRZEDMIOTU W JĘZYKU ANGIELSKIM | |
| KOD PRZEDMIOTU | WITCh TCH oIIS D8 17/18 |
| KATEGORIA PRZEDMIOTU | Przedmioty specjalnościowe |
| LICZBA PUNKTÓW ECTS | 4.00 |
| SEMESTRY | 2 |

| 2 | 15 | 0 | 30 | 0 | 0 | 0 |

3 CELE PRZEDMIOTU

Cel 1 The course reviews the liquid biofuels diversity on a background of other renewable energy sources, highlighting their role in the global energy balance. The basics of Polish, European and worldwide legislation regulating the production, properties and distribution of biofuels will be given together with the most typical classification based on the physical state (biogas, biomass and liquid biofuels) and the generation; the analysis

and comparison of potential raw-materials and production technologies, as well as the perspectives for further development will be discussed

Cel 2 The aim of the course is to learn modern transport biofuels obtained from renewable raw materials. The laboratory exercises will include: synthesis of biodiesel fuel from pure or waste vegetable oils, as well as yeast fermentation of hydrolysed starch combined with efficient distillation. The physicochemical properties, composition and functional quality of prepared biocomponents will be tested and compared with traditional mineral fuels. The analysis will include: chemical composition by chromatography, analysis of density, viscosity, flash point in open crucible, freezing and cloud points, selected characteristic values - acidic, neutralization, saponification, and iodine numbers, and other specified in European standards.

4 WYMAGANIA WSTĘPNE W ZAKRESIE WIEDZY, UMIEJĘTNOŚCI I INNYCH KOMPETENCJI

1 Basis knowledge in the field of organic chemistry and technology

5 EFEKTY KSZTAŁCENIA

EK1 Wiedza Student have basis knowledge on the energy policy in the world, know the main, obligatory law-regulations and understand the meaning of the carbon cycle and the sustainable energy balance

EK2 Wiedza Student have knowledge about the available alternative biofuels, recognize the fuels of various generations and know the methods of obtaining biofuels from various raw materials

EK3 Umiejętności Student is able to determine the advantages and disadvantages of biofuels in comparison to conventional energy sources

EK4 Kompetencje społeczne Student is able to select the optimal technologies for the production of biocomponents, taking into account available resources and scale of production

EK5 Umiejętności Student recognize the basic properties of biofuels and biocomponents, and is able to characterize them according to standards

6 TREŚCI PROGRAMOWE

| LABORATORIUM | | |
|--------------|--|---------------|
| LP | TEMATYKA ZAJĘĆ OPIS SZCZEGÓLOWY BLOKÓW TEMATYCZNYCH | LICZBA GODZIN |
| L1 | Organization of course, introduction to experiments, description of hazards and safety training, explaining the requirements for the laboratory reports, assessment conditions and dates of planned laboratory exercises with dividing of students for groups. | 1 |
| L2 | Enzymatic and acid catalysed hydrolysis of starch, followed by yeast fermentation and distillation. Quantitative analysis of bioalcohol by chromatography and density measurements. | 10 |
| L3 | Biodiesel synthesis from vegetable or waste oils and analysis of its physicochemical properties (density, viscosity, flash point in open crucible, freezing and cloud points, and optionally a fractional distillation of fuel, and identification of acidic, saponification, and iodine numbers). | 10 |

| LABORATORIUM | | |
|--------------|--|---------------|
| LP | TEMATYKA ZAJĘĆ OPIS SZCZEGÓLOWY BLOKÓW TEMATYCZNYCH | LICZBA GODZIN |
| L7 | Biogas production from biomass with chromatographic analysis of the gases composition. | 8 |
| L9 | Final test evaluating the knowledge of the biofuels preparation and analysis | 1 |

| WYKŁADY | | |
|---------|---|---------------|
| LP | TEMATYKA ZAJĘĆ OPIS SZCZEGÓLOWY BLOKÓW TEMATYCZNYCH | LICZBA GODZIN |
| W1 | Organization of course, conditions of assessment and dates of final exam. Definitions, introduction to actual polish, european and worldwide bioenergy policy development and perspectives | 1 |
| W2 | Alternative energy - Biomass as a raw material for solid, liquid and gaseous biofuels on the background of other renewable energy mainstreams geothermal power, wind and solar energy, and hydropower. | 1 |
| W3 | Biomass and bioenergy policy - Using of energy and oilseeds crops for the production of heat and biofuels. Forecasts and barriers for the development in the Poland and other countries. Biofuels policy and legislation. Classification of biofuels (I, II, III and IV generation biofuels). | 1 |
| W4 | Ist generation solid biofuels - The economic, social and agricultural conditions in the production and using of solid biofuels (wood, straw, hay, etc.), Biogas from municipal wastes, landfills and manures - resources and opportunities. | 1 |
| W5 | Ist generation biodiesel - Production of biodiesel from edible and waste oils resources and technologies. The conflict fuel versus food. Valorization of waste glycerol fraction. | 2 |
| W6 | Ist generation bioethanol - Bioethanol and other related biocomponents (bioETBE) fermentation of edible plants and other processes. The production efficiency from various raw materials, environmental and political considerations in world production of bioethanol | 1 |
| W7 | IIInd generation biofuels conversion of lignocellulosic biomass to alcohols - Bioethanol from lignocellulosic biomass - advanced hydrolysis and fermentation processes. Obtaining of biomethanol, biobutanol and bioDME | 2 |
| W8 | IIInd generation biofuels biomass pyrolysis - Biohydrogen and biogas derived from biomass gasification. Liquefaction of biomass to liquid biofuels (F-T synthesis). | 1 |
| W9 | IIInd generation biofuels biodiesel and biooil - Biooil and biodiesel from hydrodeoxygenation and decarbonation of animal and vegetable fats. | 1 |
| W10 | IIIrd generation biohydrogen and fuel cells - Biohydrogen as an example of IIIrd generation biofuels and the principles of fuel cells. | 1 |

| WYKŁADY | | |
|---------|---|---------------|
| LP | TEMATYKA ZAJĘĆ OPIS SZCZEGÓLOWY BLOKÓW TEMATYCZNYCH | LICZBA GODZIN |
| W11 | IIIrd generation biofuels from algae - Algae as a modern natural source with high carbon dioxide assimilation. Their harvest and processing gasification, transesterification and enzymatic processes. | 1 |
| W12 | IVth generation biofuels summary and perspectives- Prospects for the production of the next generation biofuels - the genetic modification of plants in order to increase the production efficiency and closing CO ₂ cycle. Basic information about the necessity and possibilities of the uptake and storage of carbon dioxide. | 1 |
| W13 | Final test | 1 |

7 NARZĘDZIA DYDAKTYCZNE

N1 Laboratory experiments

N2 Lectures

8 OBCIĄŻENIE PRACĄ STUDENTA

| FORMA AKTYWNOŚCI | ŚREDNIA LICZBA GODZIN NA ZREALIZOWANIE AKTYWNOŚCI |
|--|---|
| Godziny kontaktowe z nauczycielem akademickim, w tym: | |
| Godziny wynikające z planu studiów | 45 |
| Konsultacje przedmiotowe | 5 |
| Egzaminy i zaliczenia w sesji | 2 |
| Godziny bez udziału nauczyciela akademickiego wynikające z nakładu pracy studenta, w tym: | |
| Przygotowanie się do zajęć, w tym studiowanie zalecanej literatury | 25 |
| Opracowanie wyników | 20 |
| Przygotowanie raportu, projektu, prezentacji, dyskusji | 10 |
| SUMARYCZNA LICZBA GODZIN DLA PRZEDMIOTU WYNIKAJĄCA Z CAŁEGO NAKŁADU PRACY STUDENTA | 107 |
| SUMARYCZNA LICZBA PUNKTÓW ECTS DLA PRZEDMIOTU | 4.00 |

9 SPOSÓBY OCENY

OCENA FORMUJĄCA

F1 Final test grade

F2 Laboratory reports

F3 Practical work

F4 Preparation to laboratories

OCENA PODSUMOWUJĄCA

P1 Average from grades

WARUNKI ZALICZENIA PRZEDMIOTU

W1 Presence on lectures and laboratories

W2 Positive grade from tests and reports

OCENA AKTYWNOŚCI BEZ UDZIAŁU NAUCZYCIELA

B1 Test

B2 Laboratory reports

B3 Preparation to practical work

KRYTERIA OCENY

| EFEKT KSZTAŁCENIA 1 | |
|---------------------|--|
| NA OCENĘ 2.0 | Lack of knowledge on the energy policy in the world, the main obligatory law-regulations, the carbon cycle and the sustainable energy balance |
| NA OCENĘ 3.0 | 51-60% points from average grades |
| NA OCENĘ 3.5 | 61-70% points from average grades |
| NA OCENĘ 4.0 | 71-80% points from average grades |
| NA OCENĘ 4.5 | 81-90% points from average grades |
| NA OCENĘ 5.0 | student ma dobrze ugruntowaną wiedzę z zakresu otrzymywania z surowców odnawialnych i badania właściwości biopaliw, w szczególności ciekłych biopaliw transportowych |
| EFEKT KSZTAŁCENIA 2 | |
| NA OCENĘ 2.0 | Lack of knowledge about the available alternative biofuels, the fuels of various generations and the methods of obtaining biofuels from various raw materials |
| NA OCENĘ 3.0 | 51-60% points from average grades |
| NA OCENĘ 3.5 | 61-70% points from average grades |
| NA OCENĘ 4.0 | 71-80% points from average grades |
| NA OCENĘ 4.5 | 81-90% points from average grades |

| | |
|----------------------------|---|
| NA OCENĘ 5.0 | above 91% points from test. Good knowledge of the available alternative biofuels, the fuels of various generations and the methods of obtaining biofuels from various raw materials |
| EFEKT KSZTAŁCENIA 3 | |
| NA OCENĘ 2.0 | Lack of ability to determine the advantages and disadvantages of biofuels in comparison to conventional energy sources |
| NA OCENĘ 3.0 | 51-60% points from average grades |
| NA OCENĘ 3.5 | 61-70% points from average grades |
| NA OCENĘ 4.0 | 71-80% points from average grades |
| NA OCENĘ 4.5 | 81-90% points from average grades |
| NA OCENĘ 5.0 | above 91% of points from test. Good knowledge of the advantages and disadvantages of biofuels in comparison to conventional energy sources |
| EFEKT KSZTAŁCENIA 4 | |
| NA OCENĘ 2.0 | Lack of knowledge about the possible technologies for the production of bio-components, taking into account available resources and scale of production |
| NA OCENĘ 3.0 | 51-60% points from average grades |
| NA OCENĘ 3.5 | 61-70% points from average grades |
| NA OCENĘ 4.0 | 71-80% points from average grades |
| NA OCENĘ 4.5 | 81-90% points from average grades |
| NA OCENĘ 5.0 | above 91% of points from test. Good knowledge on the available technologies for the production of bio-components, taking into account the type of resources and scale of production |
| EFEKT KSZTAŁCENIA 5 | |
| NA OCENĘ 2.0 | Student don't recognize the basic properties of biofuels and biocomponents, and is not able to characterize them according to standards |
| NA OCENĘ 3.0 | 51-60% points from average grades |
| NA OCENĘ 3.5 | 61-70% points from average grades |
| NA OCENĘ 4.0 | 71-80% points from average grades |
| NA OCENĘ 4.5 | 81-90% points from average grades |
| NA OCENĘ 5.0 | Above 91% from avarage grades. Student recognize the basic properties of biofuels and biocomponents, and is able to characterize them according to standards |
